Student of Computer Systems Engineering at Universidad Privada del Norte (eighth semester). With a strong interest in programming, I am currently refining my technical skills. I always strive to add value to the teams I participate in.

Skills

Leadership and Project Management: I have led work teams on various academic projects, utilizing agile methodologies such as RUP and Agile. I adapt quickly to team dynamics, evaluating timelines, risks, and prioritizing features based on project requirements and deadlines.

Teamwork and Communication: I foster open and effective communication within the team to achieve the best results. I consistently aim for group growth and development, ensuring objectives are met within the established deadlines.

Technical Skills:

- Intermediate proficiency in MS Office.
- Basic knowledge of databases (SQL and NoSQL).
- Strong adaptability to any programming language and frameworks.
- Basic knowledge in modeling, UML design, and Figma.
- Experience with version control using Git.

Languages:

- English - B2, Upper Intermediate (EF SET Certificate, December 2024).

EDUCATION:

2020 – a la fecha   **Universidad del Privada del Norte (On-campus)**
- Faculty of Engineering, Systems Section.
- Eighth semester.
- Top 20% (2023-2024).

2022 - 2022   **Academlo (Online)**
- Technical education in web development with JS and Python.

2014 – 2019   **Colegio Santa María de Breña (Breña, Lima)**
- **Secondary Education.**

2007 – 2013   **Colegio San Lucas (Pueblo Libre, Lima)**
- **Primary Education.**

PROJECTS

Sept 2024 – Nov 2024   **Sazón y Sabor – Thematic Restaurant Website**

- Designed flowcharts and the database structure, integrating the API for use in the frontend.

	• Implemented the connection between the frontend and the database via API, enabling user account creation and efficient data management. • Apply three design patterns (factory, command and façade) to optimize API interaction, improving the system's scalability and maintenability.
Sept 2024 – Nov 2024	**Agenda ~ Mobile App for Tracking Daily User Activities (Android)** • Handled date conversión and default date settings. • Assited each team member in integrating their project progress. • Synchronized and enhanced project compatibility with different databases (SQLite, TXT and MySQL via Node.js service). • Mainteined project documentation.

Additional Information

• Acted as the delegate for several courses at Universidad Privada del Norte (2024).
• Ranked in the top 20% of the Computer Systems Engineering program at Universidad Privada del Norte (2024).
• Participated in my university's robotics fair (2024).
